Running Sum of 1d Array

```
class Solution {  
    public int[] runningSum(int[] nums) {  
  
        for(int i=1;i<nums.length;i++){  
            nums[i]=nums[i-1]+nums[i];  
        }  
        return nums;  
    }  
}
```

The screenshot displays a coding platform interface for the problem "1480. Running Sum of 1d Array".

Problem Description (Left Panel):

- 1480. Running Sum of 1d Array** (Solved)
- Given an array `nums`. We define a running sum of an array as `runningSum[i] = sum(nums[0]...nums[i])`.
- Return the running sum of `nums`.
- Example 1:**
Input: `nums = [1,2,3,4]`
Output: `[1,3,6,10]`
Explanation: Running sum is obtained as follows: `[1, 1+2, 1+2+3, 1+2+3+4]`.
- Example 2:**
Input: `nums = [1,1,1,1,1]`
Output: `[1,2,3,4,5]`
Explanation: Running sum is obtained as follows: `[1, 1+1, 1+1+1, 1+1+1+1, 1+1+1+1+1]`.

Test Results (Middle Panel):

- Accepted (100%)
- Testcase: Accepted (0 ms)
- Case 1, Case 2, Case 3: All passed.
- Input: `nums = [1,2,3,4]`
- Output: `[1,3,6,10]`
- Expected: `[1,3,6,10]`

Code (Right Panel):

```
1 class Solution {  
2     public int[] runningSum(int[] nums) {  
3  
4         for(int i=1;i<nums.length;i++){  
5             nums[i]=nums[i-1]+nums[i];  
6         }  
7         return nums;  
8     }  
9 }  
10
```
