1185. Day of the Week

Solved

EasyTopicsCompaniesHint

Given a date, return the corresponding day of the week for that date.

The input is given as three integers representing the `day`, `month` and `year` respectively.

Return the answer as one of the following values: ("Sunday", "Monday", "Tuesday", "Wednesday", "Thursday", "Friday", "Saturday").

Note: January 1, 1971 was a Friday.

Example 1:

Input: day = 31, month = 8, year = 2019

Output: "Saturday"

Example 2:

Input: day = 18, month = 7, year = 1999

Output: "Sunday"

TestcaseTest Result
