Java Date and Time

```
import java.io.*;
import java.util.*;

public class Solution {

    public static String findDay(int month, int day, int year) {

        Calendar cal = Calendar.getInstance();

        cal.set(year, month - 1, day);

        String[] days = {
            "SUNDAY",
            "MONDAY",
            "TUESDAY",
            "WEDNESDAY",
            "THURSDAY",
            "FRIDAY",
            "SATURDAY"
        };

        return days[cal.get(Calendar.DAY_OF_WEEK) - 1];
    }

    public static void main(String[] args) throws IOException {

        Scanner sc = new Scanner(System.in);

        int month = sc.nextInt();
        int day = sc.nextInt();
        int year = sc.nextInt();

        System.out.println(findDay(month, day, year));

        sc.close();
    }
}
```
